

EDAG SPECIAL- PURPOSE VEHICLES

DEVELOPMENT –
INTEGRATION –
CONVERSION

**YOUR GLOBAL MOBILITY
ENGINEERING EXPERTS**

We are your competent partner in the field of **official and special-purpose vehicles**.

In the process, we can draw on almost 30 years' experience and know-how in the development of special-purpose vehicles.

Taking initial ideas as our starting point, we work with you to develop functional special solutions tailored to your specific requirements, and see your development process through to the finished vehicle.

As well as vehicle manufacturers, our customers also, of course, include various authorities and aid organisations. In addition, body manufacturers from a wide range of sectors also draw on EDAG's development know-how.

Our Service Portfolio

- Evaluation of calls for bids issued by public authorities
- Participation in set-up & approval discussions with sales, production and representatives of authorities
- Development and manufacturing electrical systems for special-purpose vehicles
- Installation space testing
- Mount & trim development
- Generation of PDM sheet & parts lists
- Simulation of physical tests
- Crash tests in accordance with customer requirements
- Supplier sourcing & management
- Special-purpose vehicle manufacturing

Do you have special requirements for your vehicle?

Then contact us.
