THROUGH
HIGH TECH SOLUTIONS

YOUR GLOBAL MOBILITY ENGINEERING EXPERTS

High-end sports cars at EDAG

High performance cars have always been **fascinating** to people all over the world. When talking about **sports cars** nearly everyone of us has this one particular car on its mind – **the dream car**.

EDAG has successfully completed many projects for sports car manufacturers. With our **broad range of knowledge**, we can shape the appearance of remarkable driving machines. It is everything you see and feel that makes a car **better and more special** than others. Regardless of whether it is an low or mid-range quantity project, we will find **resourceful solutions** for body, exterior and interior combined with the **highest quality** demands.

We are proud that we have been given the chance to show this, by developing some of the most **inventive** sports cars of our time. With strong passion we combine new levels of innovation and performance to create your next **bespoke high-performance car**.

Our performance in sports car engineering:

- BiW / Exterior / Interior from a single source
- Concept development
- Simulation and cost calculation
- Design and development
- Lightweight engineering
- Production support on site

Tailored for exclusive sports cars:

- Exceptional performance solutions
- Comprehensive material expertise, especially for lightweight materials
- Supplier management for high quality finish
